

May 6, 2016

To Whom it May Concern,

As the coordinator of the Math Centre at Humber College, I would like to recommend Michael Gennari as a hard working and skilled employee. I have had the pleasure to know and work with Michael for the 4 month winter 2016 academic term. Michael worked with me as Math Centre staff and tutored students in mathematics, physics, chemistry, programming and provided a more complete understanding of lecture concepts to students that visited. He also analyzed research conducted by the Math Centre and continued work on a number of larger Math Centre projects.

I believe Michael has done an outstanding job tutoring students, both in his own field of study but also supported chemistry and a few other math related topics. Michael has spent considerable time learning and reviewing material to be able to tutor students in mathematics and other fields beyond the level of his current Waterloo courses. He has also worked hard to ensure quality and effective tutoring to all students.

On top of his excellent tutoring, Michael has spent his down time working on a number of projects to benefit the Math Centre. He has spent extensive time reviewing research work conducted by the Math Centre and has completed a summary review, poster and a full report to complement this research. He has also spent considerable time designing and learning to code in Swift and Objective-C in order to create an iPad app for the Math Centre.

Michael has displayed exceptional tutoring skill and great work ethic and is a valued team member in the Math Centre. His commitment, perseverance, and pursuit of knowledge would make him an excellent member of any academic job. I encourage you to look favourably upon his application.

Sincerely,

Cameron Redsell-Montgomerie
